# County of San Luis Obispo

TO: Board of Supervisors

FROM: Public Works

Dave Flynn, Deputy Director of Public Works

VIA: Paavo Ogren, Director of Public Works

DATE: 12/10/2013

SUBJECT: Request to approve the revised San Luis Obispo County Local Hazard Mitigation Plan (Clerk's file). All Districts.

## **RECOMMENDATION**

It is on our recommendation that your Honorable Board, acting as the San Luis Obispo County Flood Control and Water Conservation District (District):

1. Receive a presentation on the updated and revised San Luis Obispo County Local Hazard Mitigation Plan; and
2. Approve, and authorize the Chairperson to sign, the updated and revised Local Hazard Mitigation Plan on behalf of the District.

## **DISCUSSION**

As part of Office of Emergency Services' request for your Honorable Board to adopt the Local Hazard Mitigation Plan (LHMP) for the County, it is necessary for your Board, acting as the governing Board of the District, to also adopt the LHMP to meet FEMA grant eligibility requirements. This plan adoption includes the Arroyo Grande Creek Waterway Management Program and associated project funding and implementation. Once adopted, FEMA will then review the plan for consideration of accepting it as a multi-jurisdictional LHMP, for both the County and the District. If such an approval is given, which staff anticipates, the District will be eligible for federal hazard mitigation grants for efforts on current and future flood control projects.

## **OTHER AGENCY INVOLVEMENT/IMPACT**

For this proposed adoption by the District, County Public Works and OES staff have worked jointly to update the LHMP and with FEMA on the proposed revision.

## **FINANCIAL CONSIDERATIONS**

The plan update development has been done through existing staffing within Public Works and OES and no additional funding from the District is required.

## **RESULTS**

A significant result is the Flood Control and Water Conservation District will remain eligible for certain federal hazard mitigation grants. As projects noted in the LHMP are implemented, the results will also include reducing risk from natural hazards by identifying resources, information, and strategies for risk reduction, while helping to guide and coordinate actual mitigation activities.
